DOLAN

The ideal fibre for all **outdoor** applications

www.dolan-gmbh.com

Looking good ...

DOLAN – Made in Germany

DOLAN is a high quality branded acrylic fibre which has been successfully utilised in various outdoor applications for more than 25 years.

DOLAN is produced via a special wet spinning process in which pigments are injected to the polymer solution before extruding it into fibre. This special manufacturing process produces a fibre with unique properties. DOLAN has excellent colour and weather fastness and is very well suited for the production of outdoor fabrics such as awnings, boat covers, sun umbrellas, garden furniture – and its most demanding application – fabrics for convertible car tops.

DOLAN

The ideal fibre for all outdoor applications

DOLAN - Delivering superior quality

Excellent colour fastness

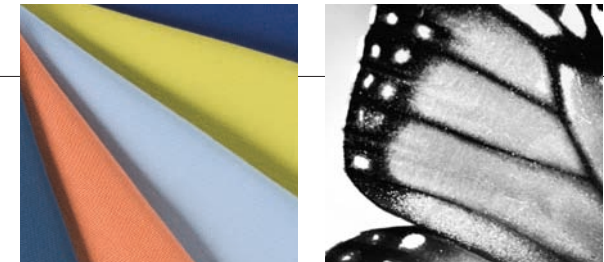

Very good weather fastness

Rot proof

**High durability &
abrasion resistance**

High UV-protection & comfort

DOLAN stands out through its excellent colour fastness. All utilised pigments which are injected into the fibre have a very high level of light fastness. A standardised test (DIN EN ISO 105/B-02, blue scale) shows a light fastness level of at least 7 out of 8 possible marks. All our shades remain rich in colour and do not fade even after exposure to intense sunlight.

DOLAN – Fulfilling the highest specifications

Excellent colour fastness

Very good weather fastness

Rot proof

High durability &

abrasion resistance

High UV-protection & comfort

DOLAN was developed specifically for outdoor applications and withstands the harshest weather conditions. This is most evident in convertible car top fabrics for which DOLAN has to meet demanding requirements set by the automobile industry. Years of successful use in such products is further proof of the high quality of our fibres. The superior weatherfastness of DOLAN is also advantageous in applications such as awnings, boat covers, sun umbrellas and garden furniture, where a high level of weather fastness is required.

DOLAN - Creating durable fabrics

Excellent colour fastness

Very good weather fastness

Rot proof

**High durability &
abrasion resistance**

High UV-protection & comfort

Textiles which are utilised outdoors must be durable. DOLAN fibre is resistant to rot, mould, fungal decay and small insects (e.g. moths, termites). Our speciality acrylic is extremely rot-proof and therefore an ideal choice for various outdoor fabrics.

DOLAN

The ideal fibre for all outdoor applications

DOLAN - For robust, long lived products

Excellent colour fastness

Very good weather fastness

Rot proof

**High durability &
abrasion resistance**

High UV-protection & comfort

Fabrics made from DOLAN retain fabric strength and abrasion resistance throughout the fabric service life compared to other products which quickly deteriorate when exposed outdoors. These characteristics are most important for products which are exposed to different weather conditions and frequently used over a period of many years. Fabrics made from DOLAN are very durable and maintain their textile appearance.

DOLAN

The ideal fibre for all outdoor applications

DOLAN - Assuring optimum sun protection

Excellent colour fastness

Very good weather fastness

Rot proof

High durability &

abrasion resistance

High UV-protection & comfort

Fabrics made of DOLAN can block up to 90 % of UV-rays, depending on the colour of the fabric, and offer protection from heat and bright light. DOLAN is also certified with the Oeko-Tex label. This certificate guarantees that our fibre is free of any harmful substances.
